

```
var Torvorn = Class.create({  
  Torvorn.prototype = {}  
  initialize: function() {  
    var self = this;  
    var torvornName = self.getName;  
    var torvornAge = self.getAge;  
  
    this.objectID = getHostTorvorn;  
    this.name = getHostTorvornName;  
    this.displayName = {this.name,  
                        this.name,  
                        this.name,  
                        this.name};  
    this.host = getHostTorvornName;  
  }  
});
```
