

```
var Torrent = Class.create({
  prototype: {
    initialize: function() {
      var self = this;
      var torrentNode = self.getTorrentNode();
      var torrentNode = self.getTorrentNode();

      this._torrentID = getTorrentID();
      this._name = getTorrentName();
      this._displayNode = {
        name: this._name,
        size: this._size,
        hash: getTorrentHash()
      }
    }
  }
});
```

Program Under Test

Analyser

```
l = new LinkedList
node = new Node
l.add(node)
l.remove(node)
l.add(node)
assert (l.size == 1)
```
